SECTION - A / भाग - अ

SECTION - A

1. Answer the following questions in Hindi or English as directed.

1. निम्नलिखित प्रश्नों के उत्तर हिंदी या अंग्रेजी में दिए गए निर्देशानुसार दें।

1.1. The left and right halves of the body have the same design.

1.2. The animal tissue differentiate from the three embryonic germ layers.

1.3. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.4. List two conditions which need to be satisfied for the work to be done on an object?

1.5. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.6. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.7. List two conditions which need to be satisfied for the work to be done on an object?

1.8. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.9. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.10. List two conditions which need to be satisfied for the work to be done on an object?

1.11. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.12. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.13. List two conditions which need to be satisfied for the work to be done on an object?

1.14. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.15. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.16. List two conditions which need to be satisfied for the work to be done on an object?

1.17. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.18. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.19. List two conditions which need to be satisfied for the work to be done on an object?

1.20. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.21. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.22. List two conditions which need to be satisfied for the work to be done on an object?

1.23. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.24. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.25. List two conditions which need to be satisfied for the work to be done on an object?

1.26. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.27. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.28. List two conditions which need to be satisfied for the work to be done on an object?

1.29. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.30. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.31. List two conditions which need to be satisfied for the work to be done on an object?

1.32. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.33. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.34. List two conditions which need to be satisfied for the work to be done on an object?

1.35. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.36. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.37. List two conditions which need to be satisfied for the work to be done on an object?

1.38. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.39. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.40. List two conditions which need to be satisfied for the work to be done on an object?

1.41. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.42. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.43. List two conditions which need to be satisfied for the work to be done on an object?

1.44. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.45. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.46. List two conditions which need to be satisfied for the work to be done on an object?

1.47. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.48. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.49. List two conditions which need to be satisfied for the work to be done on an object?

1.50. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.51. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.52. List two conditions which need to be satisfied for the work to be done on an object?

1.53. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.54. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.55. List two conditions which need to be satisfied for the work to be done on an object?

1.56. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.57. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.58. List two conditions which need to be satisfied for the work to be done on an object?

1.59. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)

1.60. The volume of 50g of a substance is 20cm³. If the density of water is 1 g cm⁻³, will the substance float or sink in water? Justify your answer.

1.61. List two conditions which need to be satisfied for the work to be done on an object?

1.62. Calculate the number of Aluminium ions in 0.051g of Al₂O₃. (Atomic mass of Al = 27u, O = 16u, No = 6.022 × 10²³ mol⁻¹)
